

CHRISTION CALLAHAN

SOFTWARE DEVELOPER

Tulsa, Oklahoma • (918) 935-4358 • christion.callahan@atlasstudents.com • [LinkedIn](#) • [GitHub](#) • [christioncallahan.com](#)

SUMMARY

Full Stack Developer with hands-on experience building web and mobile applications using JavaScript, TypeScript, Node.js, React, SQL, and REST APIs, complemented by current experience as a Service Center Analyst I at QuikTrip supporting enterprise POS, network, payment terminal, and store hardware systems nationwide. Skilled in backend development, database integration, technical troubleshooting, incident documentation, and cross-functional problem solving with a focus on reliable software and operational systems.

EDUCATION

Atlas School — Tulsa, Oklahoma

August 2026

Software Engineering | Computer Science and Full Stack Web Development

- Completed 1,725 clock hours of intensive project-based training across algorithms, software engineering, full-stack development, and collaborative team workflows

Tulsa Community College — Tulsa, Oklahoma

Expected December 2026

Associate of Science in Computer Information Systems

RELEVANT EXPERIENCE

QuikTrip Corporation — Tulsa, Oklahoma

October 2025 – Present

Service Center Analyst I (On-Loan)

- Diagnose and resolve POS, network, payment terminal, and store hardware issues, closing an average of 80 tickets per day across QuikTrip locations nationwide
- Respond to technical outages within an average 45-minute window to minimize operational disruption and maintain reliable store operations across the United States
- Document technical incidents and resolution procedures in the service management system to improve traceability and reduce repeat issues
- Collaborate with cross-functional teams and vendors to troubleshoot and resolve complex technical problems

OTHER EXPERIENCE

QuikTrip Corporation — Tulsa, Oklahoma — Part-Time Clerk

May 2022 – October 2025

PROJECTS

ThinkTwice | Backend Developer

2026 – Present | [GitHub](#)

- Develop backend functionality for a team-based full-stack application using Node.js, PostgreSQL, Docker, and Firebase services
- Work within a multi-service architecture integrating an Expo frontend, backend API, machine-learning service, and PostgreSQL database

QuestBoard | Full Stack Developer

2026 – Present | [GitHub](#)

- Develop a task and reward application using React Native, Expo, and TypeScript for task organization and progress tracking
- Build reusable application components and workflows for task management, rewards, navigation, and planned Firebase integration

Recipe Finder Website | Full Stack Developer

2025 | [GitHub](#)

- Collaborated on a recipe-finder website providing recipe instructions, nutritional information, and ingredient data
- Integrated API-driven workflows that retrieve requested data and dynamically display results across the application

Full-Stack Café POS System | Full Stack Developer

December 2024 | [GitHub](#)

- Developed a full-stack point-of-sale platform using Node.js, Express, SQL, and REST APIs to support order and transaction workflows
- Implemented data models and CRUD operations for consistent menu management and streamlined processes

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C, SQL **Frameworks / Libraries:** React, React Native, Node.js, Express, Expo

Databases / Services: PostgreSQL, Firebase **Tools:** Git, Linux, Docker

Technologies: REST APIs, HTML, CSS, Vite **Development:** Agile, ESLint
